### **DETAILED ACTION**

1. This communication is in response to Applicant's Amendment to Office Action dated February 8, 2007, filed August 8, 2007, and telephone interview conducted October 11, 2007.

1-1. Claims 1, 7, 11, 12, 14, 17, 23, and 27 have been amended. Claims 2, 13, 18, 28, and 29 have been canceled. Claims 1, 3-12, 14-17, and 19-27 are pending.

1-2. Claims 1, 3-12, 14-17, and 19-27 have been examined and allowed.

### **EXAMINER'S AMENDMENT**

2. An Examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to Applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

3. Authorization for this Examiner's amendment was given in a telephone interview with Mr. Jonathan M. Hollander (Reg. No.: 48,717) on October 11, 2007.

4. The claims have been amended as follows:

4-1. Replace claim 1 as follows:

1. (Currently Amended) A method of animating fluid, comprising:  
determining a fluid surface at a first time value according to a fluid simulation;  
adding at least one spray particle beneath the fluid surface, the spray particle having an initial state derived at least in part from the attributes of the fluid simulation;

Art Unit: 2128

moving the spray particle independently of the fluid simulation according to at least its initial state;

rendering the fluid surface; and

rendering the spray particle in response to the spray particle being above the fluid surface.

4-2. Replace claim 27 as follows:

2. (Currently Amended) The information storage medium of claim 17, further comprising:  
determining the fluid surface at a second time value according to the fluid simulation;  
adding at least one additional spray particle beneath the fluid surface, the additional spray particle having an initial state derived at least in part from the attributes of the fluid simulation;  
and

moving the spray particle and the additional spray particle independently of the fluid simulation according to at least their respective initial states.

4-3. Cancel claim 28 as follows:

28. (Cancelled)

4-4. Cancel claim 29 as follows:

29. (Cancelled)

### *Reasons for Allowance*

5. The following is an Examiner's statement of reasons for allowance:

5-1. The closest prior art of record discloses:

Art Unit: 2128

(1) A method for modeling and animating liquids (Foster et al., "Practical Animation of Liquids").

(2) A method for modeling the dynamic behavior of splashing fluids (O'Brien et al., "Dynamic Simulation of Splashing Fluids").

(3) A particle interaction method for simulating fluids (Premoze et al., "Particle-Based Simulation of Fluids").

**5-2.** Claims 1, 3-12, 14-17, and 19-27 are allowed in view of the claim amendments and Applicant's arguments at pages 4-17 of the Amendment filed August 8, 2007.

Specifically, independent claims 1 and 17 have been amended to identify the distinct combination of features including "the spray particle having an initial state derived at least in part from the attributes of the fluid simulation" and "moving the spray particle independently of the fluid simulation according to at least its initial state", which has not been uncovered in a single teaching, nor would a modification of prior art references be obvious to one of ordinary skill in the art to yield these limitations in the context of the claim.

Similarly, independent claim 12 has been amended to identify the distinct combination of features including "the plurality of spray particles is assigned an initial state derived at least in part from the state of the set of fluid particles" and "moving the plurality of spray particles independently of the fluid simulation according to at least the initial state of the plurality of spray particles", which has not been uncovered in a single teaching, nor would a modification of prior art references be obvious to one of ordinary skill in the art to yield these limitations in the context of the claim.

Moreover, as the courts have held that "A claim is anticipated only if each and every element as set forth in the claim is found, either expressly or inherently described, in a single prior art reference." *Verdegaal Bros. v. Union Oil Co. of California*, 814 F.2d 628, 631, 2 USPQ2d 1051, 1053 (Fed. Cir. 1987) and "The identical invention must be shown in as complete detail as is contained in the ... claim." *Richardson v. Suzuki Motor Co.*, 868 F.2d 1226, 1236, 9 USPQ2d 1913, 1920 (Fed. Cir. 1989). The elements must be arranged as required by the claim, but this is not an *ipsissimis verbis* test, i.e., identity of terminology is not required. In *re Bond*, 910 F.2d 831, 15 USPQ2d 1566 (Fed. Cir. 1990). Therefore, independent claims 1, 12, and 17 have been allowed over the prior art of record. Dependent claims are allowed as they depend upon allowable independent claims.

6. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
